

cron job has errors - no such file or director

Posted by wbwiles - 2009/05/08 03:40

I turned the cron job after setup and it returns these errors ...

(REMOVED for privacy) /public_html/administrator/components/com_guardxt/cron.guardxt.php: line 1:
?php
: No such file or director

(REMOVED for privacy) /public_html/administrator/components/com_guardxt/cron.guardxt.php: line 2:
syntax error near unexpected token `'_CMDLINE','
/h

The manual process runs fine.

Hi,

this is very strange... could you post the first lines of cron.guardxt.php here? Usually they should be:

In fact, when I comment out
//if (\$conf->cmdline!="1" && _CMDLINE == "") die('HTTP access not allowed');

And I run it from the browser it runs with some odd errors

17:59:46: Initialize check run.

Warning:

fopen((SNIP)/public_html/administrator/components/com_guardxt/assets/hashe/joomla_1.5.10.txt) : failed to open stream: No such file or directory in (SNIP)/public_html/libraries/joomla/filesystem/file.php on line 240

Notice: Undefined variable: tests in

Hi,

oops, that shouldn't happen and will be fixed in next version. However there's a simple workaround:

Get the Joomla 1.5.10 hashfile and copy it to

(SNIP)/public_html/administrator/components/com_guardxt/assets/hashe/

regards,

Oli

I am getting the same here guys
I have the 1.5.8/9/10/11 hash files
Joomla 1.5.11
Latest GuardXT

and still get this error in the cron

```
/(REMOVED)/public_html/administrator/components/com_guardxt/cron.guardxt.php: line 1: ?php  
: No such file or directory  
/(REMOVED)/public_html/administrator/components/com_guardxt/cron.guardxt.php: line 2: syntax error  
near unexpected token `'_CMDLINE';'  
/(REMOVED)/public_html/administrator/components/com_guardxt/cron.guardxt.php: line 2: `DEFINE  
('_CMDLINE', $argv);
```

Cron file starts with this !
